**USB POWERBANK  
SOLAR AA BATTERY CHARGER  
WITH 4 AA RECHARGEABLE BATTERIES**

# POWERplus® Lizard

## USB Powerbank

### SOLAR AA BATTERY CHARGER

with 4 AA rechargeable batteries

Enjoy the freedom of mobile energy!

The Lizard is a solar AA battery charger and USB powerbank in one device. Normal solar powerbanks use powerpacks as energy storage, which means that after the lifetime of the battery pack (generally 2-3 years at daily use), you cannot use the powerbank anymore. The Lizard uses rechargeable AA batteries which are available everywhere.

Furthermore, this product is much more flexible:

- Use the battery capacity which you prefer
- Use recharged batteries and charge a new set at the same time
- When you do not have charged batteries with you, you can use disposable batteries for emergency charging.

Powerful AA battery solar charger  
including 4 Ni-MH 1.000 mAh batteries

Powerbank function with  
USB out port

Integrated adjustable stand  
optimise solar charging

Solar cell: 4V, 180 mA, 0.7 Watt  
Batteries: 4 x POWERplus Ni-Mh, 1.000 mAh
